Exemplar® Plus LS

High Performance Smart Spectrometer

Spectrometer

The Exemplar® Plus LS is a high-performance smart spectrometer utilizing an aberration-corrected concave holographic grating to effectively eliminate stray light. It features a highly sensitive TE-cooled back-thinned (BT) CCD detector which is linearly summed for high dynamic range. Its long focal length, coupled with a high quantum efficiency detector, provides superior data quality over the entire 180-1100nm spectral range. The Exemplar Plus LS features a high signal-to-noise ratio, making it ideal for low light level applications especially in the UV range. It also features a built-in shutter allowing for dark scan measurements even while illuminated. As a member of the Exemplar product line, it features onboard data processing and USB 3.0 communication. The Exemplar product line is optimized for multi-channel operation, featuring ultra-low trigger delay and gate jitter.

Standard spectral configurations range from 180nm-1100nm with resolutions between 0.6nm and 6.0nm. Custom configurations are available for OEM applications.
